FCC - MAIL ROOM

Dear Sir:

Re: Children's TV MM Docket #93-48

*Kids TV
Not Start*
The 1990 Children's Television Act, requires that
broadcasters air "educational and informational
programing". Obviously, the broadcasters have
forgotten what they were mandated to observe.

I would like to see you bring television up
to the proper standards for children.

*Censorship
After*
At the same time don't you think it is about time
to impose some standards of morality and good
conduct on all of television. Time to rid the
airwaves of murder, pornography, explicit sex
scenes, nudity, and some of the material that
condones and at times promotes promiscuity on
the talk shows. Donahue, Geraldo, and various
comics on prime time seem to be the worst
offenders.

Television is transmitted to all of the viewers
in the United States. Let the silent majority
who wish to view obscene material find another
medium other than television.

Thank you for the opportunity to express my
views. I sinverely hope you find some way
to promote better television for everyone.

Yours truly,

Ainslie C. Dencker
